NEW FACTS FROM THE HISTORY OF ISIASLAV CITY IN KYIV

The paper deals with some results of studies of the territory of St. Michael's Cathedral of the Golden Cupolas in 1996-1999. The question about the presence of the defensive ramparts of the XIth century of Isiaslav City is reviewed. New data about the architecture of St. Michael's cathedral and about an unknown overgate church of the XIIth century are given.
