THE PROBLEM OF COIN MINTAGE IN XVII-TH CENTURY

The written sources contain information of coin mintage by Bohdan Khmelnytsky, Petro Doroshenko and Ivan Vyhovsky's intention to mint his own coin. But the coins have not been found so far or identified among the numismatic artifacts. This problem has been discussed for one hundred years. On the basis of written sources, political and ekonomical situations the conclusion about possible emissions of Bohdan Khmelnytsky and Petro Doroshenko and preparations of coin struck by Ivan Vyhovsky was made. Analysis of the numismatical sources and archaeological excavations in Chyhyryn, Torhovica and Lycianka can find numismatic proofs of coin mintage of Ukrainian Hetmans.
